Jones, Thomas G. Coleman. Its 29 chapters are divided into five sections: (1) normal values and method for measurements of cardiac output; (2) regulation of pumping action; (3) regulation of venous return; (4) graphic, algebraic and computer analysis of output regulation; and (5) output regulation in specific physiological and pathological states. Methods of measuring the regulation of cardiac output and the factors affecting it have been intensively studied over the past three decades. The development of cardiac catheterization techniques and increasingly more sophisticated methods for measuring flow have provided new information concerning flow patterns in both man and the experimental animal. The second edition of this book appeared a decade after the first one. Rapid changes in the field of circulatory physiology necessitated a virtual rewriting of the book. Its 29 chapters are.
