This book gives a complete proof of the geometrization conjecture, which describes all compact 3-manifolds in terms of geometric pieces, i.e., 3-manifolds with locally homogeneous metrics of finite volume. As far as the solution to the Geometrization Conjecture goes, Perelmans papers are on the arXiv ([9],[10], [11]). The papers [2], [4] also provide many more details for Perelmans papers. An approach aimed at topologists and which depends on the Geometrization Conjecture for Haken manifolds is given in the book [1]. Morgan, John W.; Tian, Gang (), The Geometrization Conjecture, Clay Mathematics Monographs, 5, American Mathematical Society, ISBN Scott, Peter The geometries of 3-manifolds. (errata) Bull.

For over years the Poincare Conjecture, which proposes a topological characterization of the 3-sphere, has been the central question in topology. Since its formulation, it has been repeatedly attacked, without success, using various topological methods.
